Seed Round · 2026

Every Startup Begins With Architecture. Avylo Makes It Instant.

Avylo AI transforms startup concepts into strategic blueprints, system architecture, and execution intelligence.

IDEA · STRATEGY · **ARCHITECTURE** · EXECUTION

FOUNDING TEAM

MH **Mohamed Habib Allah Bibani**
Co-Founder & CEO

FF **Fares Frini**
Co-Founder & CTO

AI PRODUCT INFRASTRUCTURE

The Problem

Execution is faster than ever. Strategic clarity is not.

Founders waste thousands before building the right architecture. The strategic layer is still missing.

No architecture clarity

Founders ship features without coherent system design — technical debt compounds from day one and costs tens of thousands to unwind.

Strategic guidance is inaccessible

Expert architecture consultation runs $300–$600/hr. Early-stage teams burn runway on the wrong foundation before hiring help.

Planning consumes entire sprints

Manually mapping strategy, data models, and architecture diagrams takes weeks — time that should go toward building and validating.

Fragmented, disconnected tools

Strategy in Notion. Diagrams in Miro. Roadmaps in Jira. Nothing integrates. The strategic layer is always missing.

AI accelerates code, not strategy

Copilot and ChatGPT speed up implementation — but cannot define product architecture, team structure, or execution strategy.

90% of startups fail due to poor product-market fit & planning

3–6 avg weeks lost to manual architecture & strategy planning

$450 cost of senior technical co-founder per hour of strategy

The Solution

Avylo transforms startup intent into execution-ready company architecture.

USER PROMPT

"I want to build an AI-powered HR SaaS for mid-size companies"

AVYLO

- Product Blueprint
- System Architecture
- Database Design
- GTM Strategy
- Execution Intelligence

Idea → Product Strategy → System Architecture → Execution Roadmap

New Category

A new foundational software category is emerging.

The gap between idea and execution has never been addressed at the infrastructure level — until now.

Idea Layer

Concept generation & note-taking

ChatGPT · Notion · Whiteboards

Product Intelligence Layer

Missing Until Now

Strategy · Architecture · Execution Blueprint

Avylo AI

Build Layer

Code generation & deployment

GitHub Copilot · Cursor · Vercel

Idea → Avylo → Build

WHAT THE PRODUCT INTELLIGENCE LAYER OWNS

- Product Architecture
- System Design
- GTM Strategy
- Team Intelligence
- Execution Roadmap

"AI changed coding. Avylo defines product architecture."

This is not a feature. This is a new infrastructure category — built for the generation of founders who ship with AI.

Product Experience

A product architect, systems strategist, and startup blueprint engine in one platform.

Core

AI Project Form

Structured intelligent intake that extracts full product requirements from a single description.

AI-powered

Architecture Generator

Instantly produces a layered system architecture — frontend, backend, infra, integrations.

Visual

Interactive Node System

Visual live diagram with editable, exportable architecture nodes and connection flows.

Planning

Execution Roadmap

Sprint-by-sprint delivery plan with milestones, resource requirements, and risk markers.

Intelligence

Execution Intelligence Layer

Recommends optimal team composition, technology stack, and organizational structure based on product requirements.

Data

Database Blueprint

Auto-generates entity-relationship models, schema recommendations, and data strategy.

GTM

GTM Layer

Go-to-market channel recommendations, ICP definition, and positioning framework tailored to your product.

Platform

Founder OS

A unified strategic workspace that keeps product decisions, architecture, and execution in one living system.

Market Opportunity

A new foundational software category is emerging.

AI Product Infrastructure — the operating layer between idea generation and code execution.

$124B
TAM
AI Dev Tools + Strategy Software

$18B
SAM
Product Architecture Tools

$2.4B
SOM
AI-Native Blueprint Platforms

CUSTOMER SEGMENTS

Market estimates derived from AI software, startup tooling, and enterprise architecture segments. Projections are directional.

Why Now

AI changed building. It hasn't changed planning — until now.

10×

The AI Explosion

Developer velocity has multiplied. The planning gap is widening, not closing.

4M+

Startup Acceleration

New startups registered globally every year — each needing architecture guidance.

$280K

Rising Dev Costs

Average annual cost of a senior technical co-founder. Early teams cannot afford this.

3 Weeks

Faster MVP Pressure

Average accelerator expects working MVP. No time for manual architecture planning.

THEN

Cursor accelerated coding

→

NOW

Avylo accelerates company creation

Business Model

Scalable monetization from solo founders to enterprise innovation.

Avylo lands with founders, expands through teams, and scales into enterprise and institutional ecosystems.

01 Explore → 02 Build → 03 Scale → 04 Dominate

$0 /mo

Starter

Exploration, learning, and early product validation

- 3 architecture generations/mo
- Product blueprint overview
- Database schema preview
- PDF export
- Community support

Core Engine

$19 /mo

Builder

For founders building real products faster

- Advanced generation capacity
- Full architecture pack
- MVP roadmap with sprints
- AI developer prompt packs
- Visual diagram export
- Email support

$59 /mo

Team

For startup teams scaling execution together

- Everything in Builder
- Up to 5 seats
- Shared architecture workspace
- Team prompt library & sync
- API access
- Priority support

Custom

Enterprise

For organizations building innovation infrastructure

- Everything in Team
- Unlimited seats
- SSO & SAML authentication
- Custom AI model integrations
- Dedicated onboarding & CSM
- SLA + 24/7 priority support

STRATEGIC EXPANSION PATHWAYS

API Ecosystem Pay-per-generation · Developer integrations

White-label Resellers & SaaS platforms · Revenue share

Universities Cohort licensing · Academic programs

Institutional Accelerators · Innovation labs · Bulk seats

Competitive Advantage

No competitor owns the strategic product intelligence layer.

This is not feature competition. This is category ownership. Every tool solves a slice — Avylo owns the full infrastructure layer.

FEATURE	CHATGPT	NOTION	MIRO	LUCIDCHART	AVYLO AI
AI-generated architecture	–	×	×	×	✓
Full product blueprint	×	–	×	×	✓
System + data design	×	×	–	–	✓

Startup-first workflow	×	×	×	×	✓
One unified platform	×	×	×	×	✓

Go-to-Market

A deliberate expansion strategy.

Founder-led growth + ecosystem partnerships. Product-led acquisition, institutionally amplified.

01

Founders & Indie Builders

Q2–Q3 2026

- Product Hunt
- Twitter / X
- Indie Hackers
- Founder-led growth

KPI: 500 paying users

02

Startup Ecosystems

Q3–Q4 2026

- Incubator partnerships
- Accelerator programs
- Angel networks
- VC referrals

KPI: 10 ecosystem deals

03

Universities & Labs

Q1–Q2 2027

- CS department pilots
- Innovation centers
- Research partnerships
- Edu licensing

KPI: 5 university pilots

04

Enterprise & Global

Q3 2027+

- Enterprise sales team
- Partner network
- API marketplace
- White-label deals

KPI: $2M+ ARR

Traction

Not a concept. A working product.

Built, tested, and validated — with real founders, real feedback, real signal.

100%
Core modules shipped

MVP Built

Full end-to-end platform with AI project form, architecture generator, visual node editor, and roadmap builder.

6
Core modules live

Working Platform

Architecture generator, database blueprint, team advisor, stack recommender, roadmap, and export engine all functional.

40+
Live technical validation

SDC Workshop

Live-demoed Avylo to 40+ active software engineers. Standing technical validation with real-time Q&A and in-depth architecture feedback.

120+
Builder conversations

Founder Ecosystem

120+ founder and builder conversations across Tunisia, France, Germany, and Canada. Consistent pain point confirmation across markets.

94%
Would pay for this

Early Validation

Post-workshop survey and beta interviews confirm clear willingness to pay. Problem is real, acute, and recurring.

2026 Vision

Every startup begins with Avylo.

We are building the foundational infrastructure layer for the next generation of product creation — the operating system every startup, accelerator, and innovation hub will run on.

Product OS

The foundational layer every startup runs on

Venture Engine

Helping investors accelerate portfolio companies at scale

AI Startup Infrastructure

The default platform for the next generation of builders

NOW

Product OS

Foundational platform for startup architecture

→

NEXT

Venture Engine

Ecosystem intelligence for investors & accelerators

→

FUTURE

AI Startup Infrastructure

The global default for product creation

The Founding Team

Built by founders who've lived the problem.

Mohamed Habib Allah Bibani

Co-Founder & CEO

Vision · Product · GTM · Strategic Direction

Builder of systems, not just software. Designed and built Avylo AI from the ground up — from product vision to working platform. Drives category definition, go-to-market strategy, and ecosystem partnerships.

- Full-Stack Engineering
- AI Systems Architecture
- SaaS Product Builder
- Global Execution Mindset

Built from Zero

Designed the full product vision, architecture, and codebase independently — driven by a singular belief that every founder deserves architectural intelligence.

Workshop Speaker

Delivered a 90-minute technical workshop to 40+ software engineers on AI-era architecture thinking.

Operator Mindset

Thinks in systems, ships fast, and focuses on market signal over vanity metrics. Ready to scale.

Fares Frini

Co-Founder & CTO

Platform Engineering · Technical Architecture · Product Execution

Architect behind the technical infrastructure of Avylo. Leads platform engineering, AI system design, and technical product execution. Ensures the platform scales with precision and reliability.

- Platform Engineering
- AI System Design
- Technical Architecture
- Product Execution

Technical Architect

Designs and owns the multi-service platform architecture: FastAPI, NestJS, Next.js, Prisma, Postgres — production-grade from day one.

AI Infrastructure

Built the core AI pipeline and intelligence layers that power Avylo's real-time product generation engine.

Engineering Velocity

Delivers with speed and precision. Turns complex system requirements into clean, scalable implementation.

The Ask

Seeking strategic capital, ecosystem leverage, and pilot partnerships to define the AI Product Infrastructure category.

Seed Funding
$200K–$500K

To accelerate product development, go-to-market, and hire the first 3 core team members.

Strategic Partners
Global Network

Accelerators, VC firms, and innovation hubs who can open doors to startup ecosystems worldwide.

Incubation
Program Access

Structured incubation with mentorship, workspace, and infrastructure to accelerate to Series A readiness.

Pilot Organizations
Beta Partners

Universities, accelerators, and enterprise innovation labs willing to pilot Avylo with real cohorts.
