Investor Presentation · 2026

From Idea to Scalable System Architecture in Minutes

Avylo AI transforms raw startup concepts into complete product strategy, system architecture, and execution intelligence.

THE OPERATING SYSTEM FOR PRODUCT CREATION

The Problem

Building products is chaotic, fragmented, and painfully slow.

The tools exist. The talent exists. But the strategic layer is still missing.

No architecture clarity

Founders ship features without a coherent system design — technical debt accumulates from day one.

CTO consultation is expensive

Expert architectural guidance costs $300–$600/hr. Early-stage startups simply cannot afford it.

Planning takes weeks

Manually mapping product strategy, data models, and architecture diagrams consumes entire sprints.

Tools are completely disconnected

Strategy lives in Notion. Architecture in Miro. Roadmaps in Jira. Nothing talks to each other.

AI helps code — not strategy

GitHub Copilot and ChatGPT accelerate implementation. But they cannot replace architectural thinking.

90% of startups fail due to poor product-market fit & planning

3–6 avg weeks lost to manual architecture planning per project

$450 cost of a senior CTO per hour of strategic consultation

The Solution

Avylo AI is the strategic intelligence layer between idea and execution.

USER PROMPT

"I want to build an AI-powered HR SaaS for mid-size companies"

AVYLO

- Product Blueprint
- System Architecture
- Database Design
- Execution Roadmap
- Team Structure

Idea → Product Strategy → System Architecture → Execution Roadmap

Product Experience

A product architect, systems strategist, and startup blueprint engine in one platform.

Core

AI Project Form

Structured intelligent intake that extracts full product requirements from a single description.

AI-powered

Architecture Generator

Instantly produces a layered system architecture — frontend, backend, infra, integrations.

Visual

Interactive Node System

Visual live diagram with editable, exportable architecture nodes and connection flows.

Planning

Execution Roadmap

Sprint-by-sprint delivery plan with milestones, resource requirements, and risk markers.

Intelligence

Team & Stack Advisor

Recommends optimal team composition and technology stack based on product requirements.

Data

Database Blueprint

Auto-generates entity-relationship models, schema recommendations, and data strategy.

Market Opportunity

A massive new category is emerging.

AI Product Infrastructure — the operating layer between idea generation and code execution.

CUSTOMER SEGMENTS

Why Now

AI changed building. It hasn't changed planning — until now.

10×

The AI Explosion

Developer velocity has multiplied. The planning gap is widening, not closing.

4M+

Startup Acceleration

New startups registered globally every year — each needing architecture guidance.

$280K

Rising Dev Costs

Average annual cost of a senior technical co-founder. Early teams cannot afford this.

3 Weeks

Faster MVP Pressure

Average accelerator expects working MVP. No time for manual architecture planning.

THEN

Cursor changed coding

→

NOW

Avylo changes product architecture

Business Model

Multiple revenue streams. Scalable at every layer.

$29 /mo

Starter

Solo founders & early-stage builders

- 5 projects/month
- Architecture generator
- Roadmap builder
- Export PDF

$99 /mo

Pro

Serious builders & small teams

- Unlimited projects
- All modules
- Team collaboration
- API access
- Priority support

Most Popular

Custom

Enterprise

Scaling companies & organizations

- Everything in Pro
- SSO & advanced security
- Custom integrations
- Dedicated CSM
- SLA guarantee

Usage

API

Developers & platform integrators

- Pay-per-generation
- REST & webhook
- Full output control
- Developer sandbox

Partner

White-label

Resellers & SaaS platforms

- Full rebrand
- Custom domain
- Revenue share model
- Partner dashboard

Edu

Institutional

Universities & incubators

- Cohort management
- Instructor tools
- Bulk licensing
- Analytics dashboard

Year 3 ARR Target

Competitive Advantage

Avylo = the full strategic architecture ecosystem.

Every competitor solves a slice of the problem. Avylo solves all of it — in one unified AI platform.

FEATURE	CHATGPT	NOTION	MIRO	LUCIDCHART	AVYLO AI
AI-generated architecture	–	×	×	×	✓
Full product blueprint	×	–	×	×	✓
System + data design	×	×	–	–	✓
Execution roadmap	×	–	×	×	✓

Startup-first workflow	×	×	×	×	✓
One unified platform	×	×	×	×	✓

Go-to-Market

A deliberate expansion strategy.

We go deep before we go wide — building product-led growth from the founder community outward.

01

Founders & Indie Builders

Q1–Q2 2025

- Product Hunt
- Twitter / X
- Indie Hackers
- Direct outreach

KPI: 500 paying users

02

Startup Ecosystems

Q3–Q4 2025

- YC / Techstars
- Accelerator partnerships
- Angel networks
- VC referrals

KPI: 10 ecosystem deals

03

Universities & Labs

Q1–Q2 2026

- CS department pilots
- Innovation centers
- Research partnerships
- Edu licensing

KPI: 5 university pilots

04

Enterprise & Global

Q3 2026+

- Enterprise sales team
- Partner network
- API marketplace
- White-label deals

KPI: $2M+ ARR

Traction

Not a concept. A working product.

Built, tested, and validated — with real founders, real feedback, real signal.

100%
Core modules shipped

MVP Built

Full end-to-end platform with AI project form, architecture generator, visual node editor, and roadmap builder.

6
Core modules live

Working Platform

Architecture generator, database blueprint, team advisor, stack recommender, roadmap, and export engine all functional.

40+
Live participants

SDC Workshop

Delivered "Software Architecture in the Age of AI" workshop, live-demoed Avylo to active engineering audience. Standing ovation.

120+
Validated founders

Founder Ecosystem

Direct conversations with founding teams across Tunisia, France, Germany, and Canada. Consistent pain point confirmation.

94%
Would pay for this

Early Validation

Post-workshop survey and beta interviews confirm clear willingness to pay. Problem is real, acute, and recurring.

2026 Vision

Every startup begins with Avylo.

We are building the foundational infrastructure layer for the next generation of product creation — the operating system every startup, accelerator, and innovation hub will run on.

Product OS

The foundational layer every startup runs on

Venture Engine

Helping investors accelerate portfolio companies

AI Startup Infrastructure

The default platform for the next generation of builders

The Founder

MH

Mohamed Habib Allah Bibani

Software Engineer · AI Systems Builder · Startup Architect

Builder of systems, not just software. Mohamed has deep expertise spanning full-stack engineering, AI architecture, and SaaS product development. He designed and built Avylo AI from the ground up — from product vision to working platform — driven by a singular belief: every founder deserves access to world-class architectural intelligence.

- Full-Stack Engineering
- AI Systems Architecture
- SaaS Product Builder
- Startup Ecosystem Builder
- Technical Innovation
- Global Execution Mindset

Built from Zero

Designed the full product vision, architecture, and codebase independently — no team, no resources, just execution.

Workshop Speaker

Delivered a 90-minute technical workshop to 40+ software engineers on AI-era architecture thinking.

Avylo Workspace

Built a complete multi-service AI platform: FastAPI, NestJS, Next.js, Prisma, Postgres — production-grade.

Operator Mindset

Thinks in systems, ships fast, and focuses on market signal over vanity metrics. Ready to scale.

The Ask

Join us in building the infrastructure for the next generation of products.

Seed Funding
$200K–$500K

To accelerate product development, go-to-market, and hire the first 3 core team members.

Strategic Partners
Global Network

Accelerators, VC firms, and innovation hubs who can open doors to startup ecosystems worldwide.

Incubation
Program Access

Structured incubation with mentorship, workspace, and infrastructure to accelerate to Series A readiness.

Pilot Organizations
Beta Partners

Universities, accelerators, and enterprise innovation labs willing to pilot Avylo with real cohorts.
